

Robocall Data Mitigation Plan

NT telecom hereby certifies to the implementation of the following practices:

Traceback Requests:

Pursuant to 47 CFR § 64.6305(d)(4)(v), the Company has designated a point of contact to receive notice of any incidents of illegal robocall traffic. This person's name, title, address, phone number, and email address are in the RoboCall Mitigation Database portal.

This individual will be the main contact responding to all traceback requests from the Commission, law enforcement, and the registered traceback consortium. NT Telecom will respond fully and within 24 hours to traceback requests from such entities and will cooperate in investigating and stopping any illegal robocalls.

Know-Your-Upstream Provider

NT Telecom LLC knows all the carriers from which it receives traffic and has confirmed that all are listed in the Robocall Mitigation Database and are fully STIR/SHAKEN compliant.

Robo call mitigation system

NT telecom uses Denovo Labs Class 5 system that can identify and Block illegal robocalls.

The version we are using is Release Number: V10.3.9 | 2008 - 2025.

We are a very small company that have been working with the same 2 or 3 carriers over the last few years. As a result of our Robocall Mitigation efforts we have not had a single Trace back complaint in over 2 years.
