

Kingdom Telecommunications, Inc. dba Kingdom Networks ROBOCALL MITIGATION PLAN

Kingdom Telecommunications, Inc. dba: Kingdom Networks is a Broadband Provider that resells Momentum VOIP services. Kingdom Networks is not assigned an OCN. Kingdom Networks has contracted Momentum to provide numbering for assignment to some of Kingdom Networks's customers. Kingdom Networks and Momentum connect via SIP. Momentum has implemented STIR/SHAKEN within its network and signs the originating calls on behalf of Kingdom Networks's customers routing on the third- party's IP network. Momentum utilizes the Sansay and TransNexus STIR/Shaken platforms.

To meet the non-IP network criteria for the continuing STIR SHAKEN extension (§ 64.6303 (a)(2)), the company is a member of NTCA. NTCA participates on the ATIS Non-IP taskforce working group which developed the (ATIS Solutions) non-IP call authentication solutions.

NTCA is serving as the third-party representative on the ATIS Non-IP taskforce working group for both companies.

Kingdom Telecommunications, Inc., dba: Kingdom Networks is a subsidiary of Kingdom Telephone Company. Kingdom Telephone Company is a Cooperative Voice and Broadband Provider. A Cooperative structure means that members own the company. Kingdom Telephone is the parent company.

Robocall Mitigation Plan

All voice traffic that originates on the network is subject to the following Robocall Mitigation Plan.

Know Your Customer

Kingdom Networks vets our new and re-newing customers. When the customers apply for service, Kingdom Networks gathers contact information, date of birth, and social security numbers and run a credit check on these customers using Online Utility Exchange Service. This service can highlight, age, address, and name discrepancies with the social security number ran. If the customer applies in person, a photo id is requested to verify applicant's identity.

Enforcement

The company requires customers to acknowledge in the application for new service that it is illegal to spoof or falsify your caller ID for fraudulent purposes when using their assigned phone number and that it is also illegal to make unsolicited telemarketing or illicit calls.

Customer's found abusing service will be disconnected and reported to the FCC.

Upstream Provider Knowledge

Kingdom Networks through Momentum knows all the carriers from which it receives traffic.

Kingdom Networks through Momentum has confirmed that all its connected carriers are listed in the Robocall Mitigation Database.

Kingdom Networks through Momentum incorporates traceback and prohibited traffic language in all contractual agreements with carriers.

Kingdom Networks through Momentum have reviewed the connected carrier's RMPs to learn how the carriers monitor their originating traffic to mitigation illegal robocalls.

Role In the Call Chain

Kingdom Networks through Momentum is a voice service provider with a STIR/SHAKEN implementation obligation on the IP-Portions of its network and voice service providers without a STIR/SHAKEN obligation on the Non-IP portions of its network that relies on technology that cannot initiate, maintain, carry, process, and terminate SIP calls.

Traceback

Kingdom Networks is a Broadband Provider committed to cooperating with the Commission, law enforcement, and the industry traceback consortium in investigating and stopping any illegal robocallers that we learn are using our service to originate calls. Kingdom Networks through Momentum will respond to traceback requests from the Commission, civil and criminal law enforcement, and the industry traceback consortium fully and in a timely manner within twenty-four (24) hours.

Robocall Mitigation Database Eligibility

Kingdom Networks has not been involved in any recent, formal law enforcement or regulatory investigation into suspected unlawful robocalling.

Kingdom Networks has not been prohibited from filing in the Robocall Mitigation Database (RMD).
