

Callifi LLC STIR / SHAKEN Compliance

This document outlines Callifi LLC compliance with the FCC STIR / SHAKEN requirements for handling of voice calls by gateway and voice providers including the mitigation of robocalls.

Callifi LLC uses [REDACTED] as their Voice provider. All API calls and voice traffic involving Callifi LLC's clients will be provided via the [REDACTED] platform and as such complies with the FCC STIR / SHAKEN requirements since [REDACTED] fully compliant and up to date to the FCC required guidelines including STIR/SHAKEN call attestation and provides fraud detection services that mitigate and prevent robocalls. All calls made from Callifi are signed with Full "A" attestation. Callifi LLC has close relationships with clients so Callifi LLC employs KYC as well as custom monitoring, call limits, and proactively terminate abnormal calls or unusual traffic patterns as well as unknown or not assigned caller-ids. Callifi LLC will make all attempts to comply with legal request for any suspected calls and will put all efforts that all outgoing calls are originating from specifically authenticated users.

Callifi LLC certifies that it commits to respond to all traceback requests from the Commission, law enforcement, and the industry traceback consortium, and to cooperate with such entities in investigating and stopping any illegal robocallers that use its service to originate calls.
