

Rye Telephone – Robocall Mitigation Plan

Rye Telephone (Rye), Operating Company Number 2203, is eligible for the continuing extension of the STIR SHAKEN implementation deadline as a small voice service provider §64.6304 (a)(2) that has non-IP portions within its network §64.6304(d). Rye provides local service to fewer than 100,000 voice subscriber lines.

The majority of the Rye's customers are served on the non-IP portions of its network which relies on technology that cannot initiate, maintain, carry, process, and terminate SIP calls. Rye's non-IP network is connected to carriers that do not support IP connectivity, therefore, Rye cannot upgrade that portion of its Non-IP network to IP.

Rye also originates calls within its network via SIP connection. Rye has registered with the Policy Administrator and is an authorized service provider in the STIR|SHAKEN ecosystem. Rye has implemented STIR|SHAKEN within its IP-network and signs the calls originating on the IP portions of Rye's network.

Robocall Mitigation Plan

Rye has taken reasonable steps and has mitigation processes in place to recognize and to ultimately reduce the origination of illegal robocalls on our network and continuously works to expand and enhance them. All voice traffic that originates on Rye's network is subject to the following Robocall Mitigation Plan.

Call Analytics

- Rye does not use a third-party call analytics vendor. Rye monitors its originating traffic to identify calls that meet the criteria for suspected illegal robocalls. Rye's internal call analytics procedures are described below.

Policing and Monitoring

- Continuous internal monitoring and analyzation of originating call detail records to identify anomalies and abnormalities that conflict with our established baselines of normalcy. Our baselines of normalcy are established over years of analyzing voice traffic on our network and the typical behavior of our voice subscribers. Using this historical data, past and present, we can easily identify potentially malicious behavior and act quickly to qualify legitimacy and mitigate when necessary. Mitigation may include subscriber services termination.
- Participation in Domestic Toll Fraud mitigation with one of our strategic partners that is designed to specifically identify and mitigate robocalls and call pumping. This domestic toll fraud mitigation actively monitors area codes and OCN's with a history of illegitimate intent

and has technical processes in place to flag and block calls based on unusual activity. Some of the unusual activities include frequency of calls to one number in short periods of time (call pumping) and the length of calls, etc.

- We monitor our IP network utilizing state of the art network monitoring tools to identify abnormalities within our Session Border Control and throughout our voice delivery network. We block offending IP's and phone numbers as we identify abuse participants.
- We have tight security measures in place to prevent unauthorized access to subscriber phones and voicemail.

Know Your Customers

Acceptable Use Policy:

- Rye has standard practices of confirming that businesses are legitimate and have legitimate, normal, and well-intended interest in the use of our voice services prior to permitted use.
- All subscribers are subject to vetting of their identity and legitimacy which includes:
 - o Physical business location
 - o Contact person responsible for the account
 - o State or County of incorporation
 - o Nature of customers business

Upstream Provider Knowledge

- Rye knows all the carriers from which it receives traffic and has confirmed that all of the carriers are listed in the Robocall Mitigation Database.
- Rye monitors incoming traffic from all connected carriers for suspicious call patterns indicative of illegal robocall activity.
- The connected carriers are made aware of any suspicious or illegal traffic identified and notified, that if the traffic does not cease, the calls may be blocked from entering Rye's network.
- No provider is using Rye's network to carry or process a high volume of illegal traffic. In addition, Rye is now incorporating traceback and prohibited traffic language in all contractual agreements with new upstream carriers.

Traceback and Communications

- Rye has a dedicated contact for receiving communications or points of concern for traceback investigations.
- Rye commits to cooperating with the Commission, law enforcement, and the industry traceback consortium in investigating and stopping any illegal robocallers that we learn are using our service to originate calls.

- Rye will respond to traceback requests from the Commission, civil and criminal law enforcement, and the industry traceback consortium within twenty-four (24) hours.
- Rye posts robocall mitigation information on our websites and allows our customers to opt in and opt out of our blocked call program.

Robocall Mitigation Database Eligibility

- Rye has not been involved in any formal law enforcement or regulatory investigation into suspected unlawful robocalling.
- Rye has not been prohibited from filing in the Robocall Mitigation Database (RMD).

Principals, Affiliates, Subsidiaries, and Parent Companies

Affiliates and/or Subsidiaries of Rye Telephone Company that provide voice services are listed below. Chris Reno serves as VP-Controller and Corporate Secretary of each entity and Rob Mills serves as CEO of each entity. See below for the ownership details.
