63470 Hwy. 25 N.
Smithville, MS 38870

Tel. (662) 651-4131

Fax. (662) 651-4711

Smithville Telephone Company (the Company) certifies the following about its Robocall Mitigation Program.

Smithville Telephone Company is classified as a small voice services provider previously exempted from the requirements of 47 CFR 64.6301 per 47 CFR 64.6304. In mid-2025 the Company had less than 200 voice lines.

All of the Company's voice subscribers are individually physically connected to the Company's network equipment by dedicated fiber or copper facilities and the physical locations, addresses and identities of all subscribers are known. Voice customers do not have direct access to the Company's VoIP network. The Company has a process in place to confirm the identity of new subscribers as part of the application for new service or changed service. All originating calls meet the requirements for full attestation.

The Smithville Telephone Company General Terms of Service (www.traceroad.com) prohibit the use of voice services for any unlawful purpose in Section 4 Use of Services.

Switching functions are outsourced to Toly Digital Networks, Inc. (Toly) and the Company has no direct access to the PSTN. The company uses dedicated administrative access into Toly's equipment to manage customer voice services, including identification and access controls for each customer.

The Company first implemented STIR/SHAKEN effective November 1, 2023 using this hosted switching arrangement and originating calls were signed with Toly's token. Now originating calls are signed with Smithville Telephone Company's token. Toly uses TransNexus analytics services on incoming calls from the PSTN to Smithville Telephone voice customers.

The Company commits to respond within 24 hours to all traceback requests from the Commission, law enforcement, and the industry traceback consortium, and to cooperate with such entities in investigating and stopping any illegal robocallers that use its service to originate calls

At no time in the prior two years has the Company or any entity with which the Company shares common ownership, management, directors, or control been the subject of a formal Commission, law enforcement, or regulatory agency action or investigation with accompanying findings of actual or suspected wrongdoing due to the filing entity transmitting, encouraging, assisting, or otherwise facilitating illegal robocalls or spoofing, or a deficient Robocall Mitigation Database certification or mitigation program description.

The Company does not block calls to 911.

The Company makes all reasonable efforts to ensure it does not block any calls from public safety answering points and government emergency numbers.

President
Smithville Telephone Company
