

Overview

This document constitutes Compañía Dominicana de Teléfonos, S.A. (CLARO) Robocall Mitigation Plan.

Compañía Dominicana de Teléfonos, S.A. is a Dominican full service provider telecommunications company, owned by América Móvil. A Robocall Mitigation Plan will be deemed sufficient by the Federal Communications Commission (FCC), if the voice service provider:

- includes detailed practices that can reasonably be expected to significantly reduce the origination of illegal robocalls,
- complies with the practices it describes, and
- participates in industry traceback efforts.

1 Objective and Scope

The objective is to define Compañía Dominicana de Teléfonos Robocall Mitigation Plan. Compañía Dominicana de Teléfonos, S.A. (CLARO) commitment is to prevent, as much as reasonably possible, illegal calls (robocalls) from originating in its network, as well as monitoring incoming calls to its network.

2 Use Policy

Compañía Dominicana de Teléfonos, S.A. (CLARO) has adopted Acceptable Use Policy (“Política de Uso Justo”) and / or Anti-Fraud Policy (“Política Antifraude en el Uso de Servicios Ilimitados”) and / or Policy to prevent prohibited practices (“Política para prevenir practicas prohibidas”) (collectively, "Policies") that describe prohibited practices and the corresponding consequences of engaging in those practices. The company makes the Policies available on its website to its customers and subscribers. In accordance with the Policies, customers and subscribers may not use Compañía Dominicana de Teléfonos, S.A. network, products and / or services to engage in, encourage or promote Onc, including, but not limited to, the use of Compañía Dominicana de Teléfonos, S.A. platform for dialing, robocalls, telemarketing, high volume fax, text messaging, voicemail transmission or any other transmission that violates any statute or regulation in the countries where the company operates. The Policies specify that customer access Compañía Dominicana de Teléfonos, S.A. network, products and / or services may be restricted or suspended for violation of the Policies, always in compliance with the applicable regulations.

In the service contract that the client signs with Compañía Dominicana de Teléfonos, S.A., obligations are established for the client to use the telecommunication service provided only for the use established and described in the contract and not to use it at any time to carry out the prohibited practices defined in the contract, policies and regulations

Under the service contract, a prohibited practice includes several activities, including: (i) using the service as call center lines for telephone contact campaigns and / or for carrying out and sending advertising, alerts, etc., (ii) using the service as a gateway sending bypass type communications; (iii) using the service for spam-type messages; (iv) using the service for fraudulent, criminal or illegal purposes.

If it is detected that the customer engages in any of the aforementioned prohibited practice, Compañía Dominicana de Teléfonos, S.A. reserves the right to pursue the administrative, civil and / or criminal actions that correspond permitted under the law; including, suspend totally or partially, temporarily or permanently the provision of services, always in compliance with the applicable laws and regulations.

This permits the subsidiaries to benefit from each other's experiences and solutions.

7 Suspending/Mitigating Illegal Traffic.

When suspicious traffic has been identified and verified with further investigation, the client or subscriber's service is immediately suspended, according to the local requirements regulations.

8 Participation in fraud-centric industry organizations.

Currently AMX subsidiaries are members of the Fraud and Security group of the GSMA and the TM-Forum.

9 U.S.-bound Voice Traffic

Compañía Dominicana de Teléfonos, S.A. (CLARO) traffic originating on its network enters the USA through intermediate operators which are listed on the FCC’s Robocall Mitigation Database as having either deployed the STIR-SHAKEN solution or having an appropriate robocall mitigation plan in place.

10 Glossary

FCC	U.S. Federal Communications Commission
Compañía Dominicana de Teléfonos, S.A.	América Móvil subsidiary
STIR	Secure Telephony Identity Revisited. Standardized by IETF and defines a signature to verify the calling number, and specifies how it will be transported in SIP
SHAKEN	Signature-based Handling of Asserted information using toKENs. Framework developed by the ATIS/SIP Forum IP-NNI task force to provide STIR implementation profile for service providers, STIR & SHAKEN will be the basis for authenticating calls and facilitating the ability to trust the caller ID information.
