

Venus Telephone Corporation

Box 75 County Line Road
Venus, PA 16364
Telephone 814-354-2192

Robocall Mitigation Plan

Venus Telephone Corporation is a small Pennsylvania rural ILEC serving parts of Clarion, Forest, and Venango Counties. Venus Telephone does not sell voice services to subscribers outside of its physical service area, and all voice subscribers are physically connected to the Company's central office by dedicated fiber facilities. The addresses and identities of all subscribers are verified during the application process. Venus Telephone serves under 1,000 voice customers.

Venus Telephone Corporation's network is TDM based with voice traffic traveling entirely over TDM trunks leaving and entering our network and, therefore, does not currently support STIR/SHAKEN technologies. The Company participates in several trade organizations and is investigating solutions which could potentially work in conjunction with our current TDM infrastructure.

Venus Telephone does not have IP connectivity with the PSTN. All residential and business lines are able to place only one call at a time. All residential and business customers are only able to place calls originating from their phone number.

Venus Telephone Corporation monitors voice traffic to ensure originating traffic is valid. Service may be terminated if a customer does not comply with the rules and regulations set forth by the FCC and Pennsylvania Public Utility Commission as stated in our approved tariff on file with the PA PUC.

Venus Telephone commits to working and cooperating with the FCC, law enforcement and industry traceback groups during the investigation and stopping of any illegal robocalls and will respond fully within 24 hours to all traceback requests.
