

1. The SIP Trunk Provider we use is Telnyx, LLC FCC 0018998724 and is in the robo-call mitigation Database all calls go through their system. We are installing the PBX and configuring it to work with Telnyx, LLC.
2. We have strict firewalls in place to only allow traffic from specific IPs to access our PBX system
3. All calls are logged in the PBX for traceback option and can be provided as needed.
