

Cloud Choice Voice

Stir/Shaken implementation

10/1/2024

To Whom It May Concern:

Cloud Choice Voice licenses the BICOM PBXWare software platform for its Internet PBX. Through this platform the full STIR/SHAKEN protocol has been implemented. We also audit our clients call logs to look for behaviors such as robodialing.

We also require our clients to confirm that they will not, at any time, perform robodialing functions with our infrastructure.

Thank you,

Fred King

CEO, Cloud Choice Voice
