- 5) Certification:

I, Karen G. McBride, certify that I am an officer of the company named above, and acting as an agent of the company, have personal knowledge that the company is a small voice service provider [REDACTED] counting all business and residential fixed subscriber lines and mobile phones. All business voice subscribers are small local businesses with [REDACTED] phone lines on average. Gonthier Inc. provides internet service to [REDACTED] of its voice subscribers. Currently, voice traffic originating from the company's voice network is authenticated with STIR/SHAKEN.

The following items detail the specific reasonable steps the company has taken to avoid originating illegal robocall traffic.

- 1) Incoming Calls: The company utilizes VOIP Innovations' services for all incoming calls. VOIP Innovations will sign/authenticate all incoming calls with an Attestation Level "A".
- 2) Outgoing Calls: The company utilizes Commio for all outgoing calls. Commio will sign/authenticate all outgoing calls with an Attestation Level "B".
- 3) SIP Passwords: All SIP devices deployed are password protected with a 12 character password which must include upper and lower case letters, numbers, and symbols. This password connects the SIP device to the company's VOIP server before it can make outgoing or receiving incoming calls.
- 4) Default Passwords: All SIP devices with web-management interfaces with default usernames and passwords are changed by either deleting the default user and/or changing the default password.
- 5) ATA Settings: By default, ALL call forward features built into the ATA are disabled.
- 6) Call History: All incoming and outgoing calls are logged for future reference. Call logs include time, date, originating number and receiving number.
- 7) International Subscribers: The company does not sell origination or termination services to subscribers outside the continental United States.
