

Business, minus the spam calls

THE CHALLENGE:

Scammers are more persistent than ever before: More than 50% of calls in the U.S. are spam.

Phone scams are everyone’s problem. Companies are struggling to defend their networks from spam calls targeting their customers, adding an extra layer of complexity to their operations. To make matters worse, scammers are getting more creative and believable with their scams. By using deceptive tactics like caller ID spoofing, they’re reaching more and more of their targets. Sadly, in addition to being annoying, robocalls calls are costly: Companies lose half a billion dollars a year on account of spam calls.

THE SOLUTION:

RoboKiller Enterprise: A spam call blocking solution that prevents 99% of spam calls.

RoboKiller Enterprise is the API version of the award-winning RoboKiller app, with spam-call blocking technology that’s 99% effective.

RoboKiller’s Enterprise API provides real-time decision-making for unknown, fraudulent, and deceptive phone calls for businesses of all sizes. Our Command Center is constantly analyzing call information and user feedback to update results in real-time and capture emerging threats before they cause harm.

BENEFITS:

 Your Network, Spam-Free

Robokiller Enterprise blocks 99% of spam calls and text messages in less than 0.01 seconds, alleviating everyone from the burden of robocalls.

 Monitor Lawful Usage of Phone Numbers

Robokiller Enterprise makes sure phone numbers provided to third parties are being used within the boundaries of the law, protecting your company’s integrity.

 FCC STIR/SHAKEN Compliance Made Easy

By implementing a robocall mitigation program, your systems become origins of trust. With RoboKiller Enterprise, companies are equipped to monitor, identify, and block fraudulent activity.

 Protect Your Productivity

Robocalls entering your network waste agents’ time, resulting in decreased productivity and revenue. RoboKiller Enterprise helps shield your company’s network from robocalls, preventing system downtime.

 Provide Quality Numbers to Your Customers

Robokiller ensures high-quality numbers in your phone number pool, allowing your customers to get their calls through.

Business, minus the spam calls

HOW IT WORKS:

RoboKiller analyzes data in real-time to identify and stop spam. By leveraging our growing database of 600 million phone numbers and 550 million customer feedback reports, our robocall protection technology blocks 99% of spam calls in less than 0.01 seconds.

FEATURES:

Robust Audio Analysis/ML

RoboKiller pioneered the use of AI, machine learning, and audio fingerprinting to stop spam, with highly accurate interception, identification, and blocking capabilities.

Flexible SIP and HTTP Integrations

Leverage industry-standard methods for faster implementation (telephony signaling passed through us). Get maximum control and visibility with our end-to-end spam identification and blocking solution.

Easy Integration with Near-Infinite Scalability

No need to break the bank or staff a team; our solutions are enterprise-ready. With real-time or bulk processing, our API can handle any call volume.
