

Robocall Mitigation Program Description

1. There are 2 kinds of PSTN switches (TDM switch and IMS) in Taiwan.
For TDM switch, calling number is defined at switch side, end user cannot modify calling number.
For IMS, end user should register on IMS core, illegal calling number cannot make call.
STIR/SHAKEN method is not suitable for above configuration.
2. IP NNI is still not acceptable between voice operators in Taiwan at this time.
3. Calling number modification is illegal in Taiwan.
