Participation in FCCs Enforcement Database		
Company Name	499 Filer ID	FRNs associated with 499
Advanced Telecom Solutions, LLC	832310	0026-7418-76

Advanced Telecom Solutions LLC ("ATS") has implemented a Robocall Mitigation Program, as required by Section 4(b)(5)(C) of the TRACED Act and 47 C.F.R. §64.6305, as documented below.

Customer Vetting Process

ATS implements a rigorous "know your customer" process, specifically designed to prevent new and renewing customers from using its network to originate illegal calls. ATS vets the identity of the business and wholesale subscribers as part of the service initiation process. ATS requires information to identify the business, including legal business name, federal tax identification or corporate charter number (if a corporation), and complete business address. This information may be provided to third-party agencies to determine the credit and fraud risk associated with the potential customer. If ATS cannot validate the customer based on the initial information provided, ATS may require additional information to validate the business.

A customer that activates service with ATS is prohibited from abusive, fraudulent, or illegal use of any ATS services. If an ATS customer uses ATS's service for abusive, fraudulent, or illegal purposes, ATS service agreements and service guides allow it to terminate service to that subscriber.

Monitoring Plan

ATS analyzes voice traffic to identify and monitor patterns consistent with robocall campaigns, fraudulent calls, or messages. If ATS detects a pattern consistent with illegal robocalls or otherwise has reason to suspect unlawful activity is taking place over its network, ATS will identify the party using its network to originate, route, or terminate these calls and take appropriate action. Such action may include, but is not limited to, initiating a traceback investigation, verifying that the originating commercial customer owns or is authorized to use the Caller ID number, terminating, or suspending the party's ability to originate, route, or terminate calls on its network, or notifying law enforcement authorities.

Responding to Traceback Requests

ATS is committed to responding fully and in a timely manner to all traceback requests from the Commission, law enforcement, and the industry traceback consortium and to cooperating with such entities in investigating and stopping any illegal robocallers that use its service to originate calls. ATS has designated a traceback response contact who is aware of the traceback requirements contained in 47 C.F.R. §64.1200(n)(1) and the obligations contained in 47 C.F.R. §64.1200(n)(2) in the event ATS receives the notification of a traceback request. ATS maintains current and correct information about its upstream customers so that it can provide accurate responses to traceback requests.

All requests for tracebacks must be issued in writing via letter, e-mail, or fax to the single point of contact listed below. The request for a traceback must include the following information:

- Company / Organization Name
- Company /Organization Address
- Requestor's Name
- Requestor's Title
- Requestor's phone number
- Requestor's e-mail

Single Point of Contact for Traceback Requests:
