

Option 3: no stir/shaken implementation – performing robocall mitigation.

The filer certifies that all of the calls that it originates on its network are subject to a robocall mitigation program consistent with 47 CFR §64.6305(a), which shall include reasonable steps to avoid originating illegal robocall traffic and shall include a commitment to respond fully and within 24 hours to all traceback requests from the Commission, law enforcement, and the industry traceback consortium, and to cooperate with such entities in investigating and stopping any illegal robocallers that use its service to originate calls.

The filer also certifies that any prior certification has not been removed by Commission action and it has not been prohibited from filing in the Robocall Mitigation Database by the Commission, and that it has not implemented the STIR/SHAKEN authentication framework on any portion of its network.

In addition, the filer certifies that the information below details the specific reasonable steps it had taken to avoid originating illegal robocall traffic as part of its robocall mitigation program, the status of its implementation of stir/shaken across its entire network and, if applicable, the type of extensions it received under 47 CFR §64/6304.

steps taken to avoid originating illegal robocall

A US Cellular Roamer subscriber that parked on a Partner network in Israel, will perform authentication process with HLR/HSS on his US home network.

Only after performing authentication and Location Update in front of home HLR/HSS, the roamer subscriber will be able to start making calls with the Caller-ID with which he performed the Authentication with his home HLR/HSS.

Partner Fixed line services:

The identity of the source number of "fixed line" customers calls is based on the numbering plan approved by the Ministry of Communications.

Calls without caller ID from this range blocked by Partner.

Partner w2w:

World Calls World that pass through the International Switch of Partner, the liability of the source switch/operator to verify the originating line identification.
