Re: Execulink Telecom Inc. Robocall Mitigation

Measures taken to avoid originating Robocall traffic:

- Execulink does not knowingly engage with customers whose business involves originating Robocall traffic
- As a standard policy, all calls from our customer's equipment will be signalled with a valid 10-digit NANPA-compliant calling number which is provisioned by us for that customer
 - calls from any single-line or PBX customers on our switch will have a number we know belongs to them.
 - On this point there are very few exceptions; PBX customers are allowed to pass through any 10D number even if it doesn't belong to them, but they sign a waiver agreeing to use this for legitimate purposes
- No tandem calls from other peers can be routed towards the US
 - This is saying that our peers who can route calls through us, cannot reach the US through us.
- STIR/SHAKEN implementation is underway, per CRTC mandate.
