

STIR/SHAKEN IMPLEMENTATION & ROBOCALL MITIGATION PLAN (RMP)

Pursuant to 47 C.F.R. § 64.6305, **KEPS TECHNOLOGIES INC** submits this report on its implementation of the STIR/SHAKEN call authentication framework and its plan to prevent and mitigate illegal robocalls. This report describes the status of its implementation of STIR/SHAKEN and the practices and procedures **KEPS TECHNOLOGIES INC** has in place to mitigate illegal robocalls as of June 30, 2021. **KEPS TECHNOLOGIES INC** may modify, add, delete or otherwise alter any of the policies and procedures described in the plan at any time in order to respond to changes in its business, its capabilities and its needs.

STIR/SHAKEN Implementation

KEPS TECHNOLOGIES INC will comply fully with all conditions set forth in the FCC'S 2020 Report and Order mandating the implementation of the STIR/SHAKEN framework, as well as with the Commission's rules and policies more generally.

KEPS TECHNOLOGIES INC is implementing STIR/SHAKEN through use of the TNS Call Guardian Authentication Hub. This is a managed end-to-end call authentication solution that fully satisfies the FCC's STIR/SHAKEN requirements. It provides a standardized approach to call authentication and verification (STIR – RFC 8224, RFC 8225, RFC 8226 and SHAKEN – ATIS-1000074-E, ATIS-1000080, ATIS-1000082).

KEPS TECHNOLOGIES INC expects to implement this solution in the IP portions of its network by June 30, 2021.

- ☐ My traffic is fully attested.
- ☐ My traffic is partially attested.
- ☒ None of my traffic is yet attested, however I have implemented the Robocall Mitigation Plan outlined below.

Robocall Mitigation Plan

This Robocall Mitigation Plan describes the specific measures that the Company has implemented to detect and prevent illegal robocalls on its network as of June 30, 2021. The Company will periodically evaluate the risks it faces, the effectiveness of its policies and procedures, and its capabilities to support the measures described. Should the company determine that changes are appropriate, its practices may differ from those described below.

Risk Assessment. **KEPS TECHNOLOGIES INC** is a voice service provider offering a variety of voice calling services. Its customers generally do not originate high volume calls and **KEPS TECHNOLOGIES INC** has not received information suggesting that robocalls are originated on its network. Therefore, **KEPS TECHNOLOGIES INC** does not consider its network at high risk of originating illegal robocalls.

SPECIFIC MEASURES TO IDENTIFY AND PREVENT ILLEGAL ROBOCALLS

Customer Due Diligence: **KEPS TECHNOLOGIES INC** conducts due diligence on new and renewing customers, confirming the customer's identity and, if it is a business, its incorporation documents. The Company confirms the customer's service address for all customers.

- **KEPS TECHNOLOGIES INC** verifies customer's credit history and business reputation prior to providing service.
- **KEPS TECHNOLOGIES INC** verifies customer information when contracts are renewed or services are added.
- **KEPS TECHNOLOGIES INC** verifies the customer's identity and their right to use the telephone number presented on calls.
- **KEPS TECHNOLOGIES INC** has the policies that define the circumstances by which it will deny, suspend or terminate service to a customer.

Measures to Prevent or Avoid the Origination of Illegal Robocalls

- **KEPS TECHNOLOGIES INC** has in place an enforceable terms of use and/or an acceptable use policy. **KEPS TECHNOLOGIES INC** also has in place policies designed to detect and prevent fraudulent traffic on its network.
- **KEPS TECHNOLOGIES INC** uses TNS Call Guardian analytics technologies and services to monitor traffic on its network and identify potentially unlawful call origination activity. If **KEPS TECHNOLOGIES INC** has a reasonable basis to believe that a customer is originating illegal robocalls, it will require the customer to remedy the problem and, if effective action is not taken, **KEPS TECHNOLOGIES INC** can suspend and/or terminate service to the customer.
- **KEPS TECHNOLOGIES INC** blocks the following types of calls by default:
 - ☒ Calls originating from invalid numbers per FCC Order [2017 Call Blocking Order]
 - ☒ Calls from DNO numbers as per FCC Order [2017 Call Blocking Order]

Responding to Traceback Requests

- **KEPS TECHNOLOGIES INC** has designated an individual as a dedicated point of contact for addressing traceback requests, and a backup person to that individual. It either has provided the ITG with the contact information and business hours for those individuals, or will do so upon receipt of the first request from the ITG. See <https://www.ustelecom.org/the-industry-traceback-group-itg/for-providers/>
- **KEPS TECHNOLOGIES INC** will respond promptly to inquiries received from the Industry Traceback Group. If a pattern of questionable activity is detected, **KEPS TECHNOLOGIES INC** will require its customer to remedy the problem and, if effective action is not taken, service to the customer may be suspended and/or terminated.

Cooperation with State and Federal Regulators

KEPS TECHNOLOGIES INC will cooperate with state and federal regulators to prevent any and all illegal robocalls. Specifically, **KEPS TECHNOLOGIES INC** will:

- Respond to valid law enforcement requests;
- Provide relevant non-proprietary information in response to reasonable and legitimate requests about illegal robocalls and suspicious activities; and
- Implement mandated robocall mitigation procedures to the fullest extent possible with the goal of maximizing the mitigation of illegal robocalls.

KEPS TECHNOLOGIES INC has deployed call authentication, call labeling, and call blocking services provided by TNS. We have made great strides to protect our networks and consumers from harmful calls. **KEPS TECHNOLOGIES INC** is pleased to play a role in that improvement and will continue the necessary work to protect our customers.

Sincerely,
James Mrozovich
