

One Telecommunications sha is established in Year 1995, being the first mobile telecommunications company to operate in Albania under the former name Albanian Mobile Communications (AMC), organised under the Albanian legal framework and provides voice, data, and other electronic communications services.

In the year 2000 COSMOTE acquired AMC capital share, through COSMO-HOLDING ALBANIA S.A., and in the year 2015 our company changed its name to Telekom Albania. On May 2019, the company ownership was completely transferred from OTE Group (part of Deutsche Telekom Group) to Albania Telecom Invest ("ATI"), representing a group of well-known investors, and on September 2020 the company changed the name from Telekom Albania to One Telecommunications.

One Telecommunications has several interconnection agreements signed with national and international carriers.

One Telecommunication is always trying to protect his customers by detecting in real time fraudulent traffic.

Our Fraud Management System is analysing all the traffic of post-paid customers and the outgoing traffic of prepaid customers 24x7 basis and is generating automatic alerts and alarms every time predefined rules and criteria to detect fraudulent traffic.

When specific thresholds are met, FMS is automatically creating alarm/cases . Our analysts are monitoring and analysing in daily basis suspicious traffic volumes and patterns.

With the implementation of the new FMS system (scheduled for the next year) new rules and thresholds will be applied to detect spam, Waingiri and Robocalling activity.

The traffic from One Telecommunications towards the USA destination includes retail traffic from its own subscribers, roamers and supports FCC efforts in order to mitigate the impact of Robocalls on any international traffic that is generated from ONE Telecommunications network towards the USA.
