

Wisp.net: STIR/SHAKEN Statement

To whom it concerns,

Wisp.net is a VoIP provider for business and residential telephone services. Wisp.net is an intermediary between our customers and telecommunications companies in terminating and originating voice phone calls and text messages.

The Wisp network handles all telco communications utilizing SIP and SMPP standard communication protocols from our own network using our own servers. The Wisp network is registered with the associated registry of internet numbers as SIL-153. All phone call communications originate from direct inbound dial (DID) phone numbers which we own and/or operate.

All phone calls originating from our network are from DID's that are registered with our telecommunications peering partners. These telecommunication partners are responsible for applying STIR/SHAKEN policies according to FCC rules set for in 47 CFR § 64.6301(a).

Should any questions or problems arise in communications from our network, please Wisp at: hello@wisp.net or call us at (714) 640-3939.
