

PRAMOSOFT TECHNOLOGIES ROBOCALL MITIGATION PROGRAM

Below is the Robocall Mitigation Plan filing for PRAMOSOFT TECHNOLOGIES. This plan will be submitted to the FCC's Robocall Mitigation Database and will be adapted to adjust to the latest laws, regulations, and industry best practices.

Monitoring

PRAMOSOFT TECHNOLOGIES has monitoring and reporting systems in place to analyze high-volume voice network traffic to identify and monitor patterns consistent with robocalls. Our monitoring systems provide alerts on calling patterns with unusual spikes, traffic patterns, or attempted use of non-validated Telephone Number (TN) to detect patterns consistent with illegal robocalls.

If PRAMOSOFT TECHNOLOGIES detects a pattern consistent with illegal robocalls, or we have reason to suspect illegal robocalling or spoofing is taking place over our network, we will seek to identify the party that is using our network to originate, route, or terminate these calls. and take appropriate action.

Appropriate action may include:

- Validating that the originating party is authorized to use the TN.
- Suspending calling party's ability to originate, route, or terminate calls on PRAMOSOFT TECHNOLOGIES network.

Traceback Cooperation PRAMOSOFT TECHNOLOGIES commits to responding in a timely manner and supporting all traceback requests from the FCC, law enforcement, and the Industry Traceback Group (ITG).
