

MITIGATION PLAN
COMTECO BOLIVIATEL

According to the filling instructions of the database for the mitigation of "ROBOCALL" calls, point IX, COMTECO BOLIVIATEL requests to register the certification option number 3 (No STIR / SHAKEN Implementation)

Option 3: No STIR/SHAKEN Implementation – Performing Robocall Mitigation. The filer certifies that it commits to respond to all traceback requests from the Commission, law enforcement, and the industry traceback consortium, and to cooperate with such entities in investigating and stopping any illegal robocallers that use its service to originate calls, and that none of the voice traffic that originates on its network is authenticated with STIR/SHAKEN, and that all of the voice traffic that originates on its network is subject to a robocall mitigation program. The filer also certifies that the attached searchable PDF details the specific reasonable steps it has taken to avoid originating illegal robocall traffic as part of its robocall mitigation program, the status of its implementation of STIR/SHAKEN across its entire network, and, if applicable, the type of extension or extensions it received under 47 CFR § 64.6304.

It should be mentioned that although COMTECO BOLIVIATEL does not have the implementation of the STIR / SHAKEN standard in its systems and network platforms, its network elements only allow to originate calls based on the National Numbering Plan provided by the regulatory entity of Bolivia (ATT - Authority of Regulation and Supervision of Telecommunications and Transportation) certifying that identity theft or modification of CLI is not allowed.

On the other hand, as measures to monitor and contain fraudulent calls or Robocall, the following steps are followed:

- Continuous monitoring is carried out through CDRs to identify suspicious traffic.
- If suspicious activity is detected, such as an intermittent burst of call volume to the same destination or the same DDI, the destination is included in a black list, and COMTECO BOLIVIATEL will immediately suspend and block the traffic by number A or number B (Destination DDI).

Finally, COMTECO BOLIVIATEL does not knowingly serve clients whose business involves originating Robocall traffic.

Sincerely,

Rene S. Maldonado S.

Service Management Division Chief
COMTECO BOLIVIATEL
