Re: Certification and Robocall Mitigation Plan for Tuckersmith Communications Cooperative Ltd.

- Tuckersmith Communications does not knowingly engage with customers whose business involves originating Robocall traffic.

- Tuckersmith Communications takes the issue of robocalling and the protection of customers from unwanted and illegitimate callers seriously. We are in the process of implementing STIR/SHAKEN for Internet Protocol (IP) based voice calls and are committed to full implementation by the established November 2021 deadline in accordance with the requirements of the Canadian Radio-television Telecommunication Commission ("CRTC").

- As a standard policy, all calls from our customer's equipment will be signaled with a valid 10-digit NANPA-compliant calling number which is provisioned by us for that customer. Should a customer try to place an outbound call with an unknown number not assigned by Tuckersmith Communications, we overwrite the outbound number with the customers main DID.

Regards,

Rob Van Aaken

General Manager
Tuckersmith Communications Co-operative Ltd
