Federal Communications Commission

ROBOCALL MITIGATION CERTIFICATION

Huron Telecommunications Co-operative Limited ("HuronTel") is committed to reducing unwanted and illegal robocalls from originating or terminating on our network.

HuronTel has not yet completed STIR/SHAKEN implementation, but mitigates robocall origination through the following means:

- Calls originating from HuronTel's network are identified by the 10 digit NANP/CNAC directory number assigned to the calling party's telephone facilities.
- HuronTel does not knowingly permit subscriber originating calls that are identified by directory numbers not assigned to the customer's account, including valid numbers, fictitious numbers and foreign or international numbers.
- HuronTel does not tandem route calls through its network to the USA.

Sincerely,

Ryan McClinchey,
General Manager
HuronTel
