

STIR/SHAKEN implementation

To Whom it may Concern,

We have our OCN number and have gotten our STIR/SHAKEN Certified. We have a NSS server with **Sansay** and the Certified has been loaded to it. Our Provider Voip Innovations has set up the calls to be signed with the certificate. We Robocall Mitigate by instituting IVR's and required response technology in our platform that host our clients PBX and phone handsets. We continually monitor our clients for any influx of calls or spamming.
