

To Whom It May Concern,

Care One Communications LLC commits to respond to all traceback requests from the Federal Communications Commission, law enforcement, and the industry traceback consortium, and will cooperate with such entities in investigating and stopping any illegal robocallers that use its service to originate calls, and that none of the voice traffic that originates on its network is authenticated with STIR/SHAKEN, as we rely this in our upstream providers that has STIR/SHAKEN compliance, and that all of the voice traffic that originates on its network is subject to a robocall mitigation program.

Care One Communications relies on a combination of strict firewall rules on provisioning servers with isolation down by IP segments where applicable, and has strict rules on our upstream carrier limiting the number of channels, minutes and connections to notify our network operations immediately if there is any sudden, concerning traffic.

In addition, Care One Communications hard code all lines outbound DID's in an effort to prevent outbound spoofing.

Thank you for your cooperation.
