

VOIP.IO LLC dba VOIPIO
560 Sylvan Ave, Suite 3160
Englewood Cliffs, NJ 07632

We exclusively use bandwidth.com and voip innovations for termination. These providers are fully compliant with stir/shaken. Our firewalls permit traffic only from their IP addresses. We also monitor the traffic coming and going with IPS policies. 3cx has anti-hacking mechanisms in place as well to block IP's of bad actors. We have each phone server limited to how many outbound concurrent calls can be made. If a customer is in violation of this their extension is disabled.

Sincerely,

Giovanni Indomenico, CEO
