

This is to certify that Answer Idaho LLC DBA All Call Technologies does not own a telephony network. We only utilize Stir/Shaken certified providers. We only send originating traffic to legitimate vetted customers over these compliant network providers.

Answer Idaho LLC is primarily a call management service and enhanced messaging service provider. Outbound calls are to our subscribers originating from their clients OR to their clients originating from a live person dialing. In those cases, we send these calls out to our vetted customers over compliant telephone network providers.

Steps taken to avoid originating illegal robocall traffic

- Limit number of concurrent outbound calls per mailbox
- No automated (computer aided dialing) outbound calling equipment or software is used
- Only provide VoIP services to known clients who we provide call management to
- All outbound caller ID numbers are locked and may not be changed by clients
- All outbound caller ID numbers may only be numbers that we own through our certified providers

CURRENT NETWORK PROVIDERS:
