Robocall Mitigation Statement

All customers are only able to place calls originating from their own phone number, caller ID and call records are reviewed when service is initiated to verify legitimate caller ID information.

We do not have any process to autogenerate calls and all calls are generated by human interaction.

Our firewalls permit traffic only from their IP addresses and via VPN systems.

We utilize call blocking technology to automatically block known robocall numbers and suspicious calls identified along with customers to be able to report to us if they suspect robocalls.
