

All traffic that passes through our wholesale voice services account with voice carrier Inteliquent (aka/dba Vitelity) originates/terminates to/from VoIP PBX systems which we manage and monitor for fraudulent use. We protect all systems with strict firewalls and access credentials to prevent unauthorized use. We do NOT allow these PBX system to present caller ID information that is not either owned by our customer/PBX user as a local toll number (DID) or a number that we have verified is owned by the customer/PBX user.

All traffic that originates from PBX systems under our management does utilize Inteliquent (aka/dba Vitelity) STIR/SHAKEN implementation which is consistent with 47 CFR § 64.6301(a) and which provides authentication on our behalf.

We agree to assist in any fraud investigation where fraudulent activity appears to have originated from any system under our management and connected through our wholesale account with Inteliquent (aka/dba Vitelity).
