

Compliance with the FCC Traced Act

CyberNet Communications Inc. ("CyberNet") adheres to the FCC's mandate for voice service providers to employ STIR/SHAKEN caller ID authentication technology across the IP segments of our network infrastructure. We have a robust Robocall Mitigation program designed to prevent the origination of unlawful robocalls within our systems. This program encompasses detailed steps to counteract illegal robocalls, pledges full cooperation in traceback inquiries, and is duly registered in the FCC's Robocall Mitigation Database.

CyberNet Communications Inc. Position Statement

Committed to the fight against illegal robocalling, CyberNet enforces adherence to FCC regulations. Our mitigation strategy forms a crucial aspect of our broader effort to secure our network against misuse, working in concert with fellow carriers, regulatory agencies, and law enforcement to uphold network integrity.

CyberNet Communications Inc. Corporate Overview

CyberNet Communications Inc., is a California corporation. Our primary address is provided within the database. CyberNet has not been prohibited from filing in the Robocall Mitigation Database nor have we been subject to any Commission, law enforcement, or regulatory agency action or investigation arising from suspected unlawful robocalling or spoofing.

Robocall Mitigation Strategy

Our mitigation approach integrates comprehensive customer onboarding procedures, telephone number management, monitoring of calling patterns, and decisive actions against identified abuse or illegal activity emanating from our network.

Knowing Our Customers and Upstream Providers

CyberNet Communications Inc. maintains stringent onboarding processes for new clients, ensuring communication of our acceptable use policy. This due diligence extends to our upstream providers, ensuring all partners have active and FCC-acknowledged Robocall Mitigation plans, reinforcing our network's defense against illegal robocalling.

Monitoring and Investigation

Leveraging state-of-the-art analytical tools, CyberNet monitors for suspicious calling patterns, undertaking thorough investigations and cooperating with industry and regulatory traceback requests to pinpoint and address potential abuses swiftly.

Blocking and Enforcement

Identified instances of robocalling or abuse lead to immediate corrective actions, ranging from user education to the suspension or termination of services, ensuring compliance and protecting consumer interests.

Plan Evolution and Updates

Recognizing the dynamic nature of telecommunication fraud, CyberNet Communications Inc. remains vigilant, ready to adapt our strategies in line with emerging industry best practices and technological advancements. If there are any material changes to our Robocall Mitigation Plan, CyberNet will republish and file the updated plan to the FCC Robocall Mitigation Database within 10 days of such update.
