

TrueRing/IsoFusion

Robocall Mitigation Plan

We have not been prohibited from filing a certification in the Robocall Mitigation Database. Isofusion, Inc., its subsidiaries, nor any of our executives or principals have a history of enforcement actions. for illegal robocalls, TCPA or TSR violations or related state law violations.

All our customers are US-based companies that are thoroughly checked and validated before signing a contract.

All customers sign an agreement that restricts any illegal activity.

We are a reseller of Alianza, Inc. (RMD0006320), who has implemented STIR/SHAKEN protocols in their IP Voice networks.

We also provide a PBX-hosted solution which partially implements STIR/SHAKEN. Customers can use only dedicated numbers and physically cannot alter the caller ID.

We have fraud detection systems in place, which detect fraudulent activity and blocks outgoing calls from the customer.

We immediately react to any complaints from our carriers by investigating and blocking calls from the customer who caused the issue.

We are committed to respond fully, within 24 hours, to all traceback requests from the Commission, law enforcement, and the industry traceback consortium, and to cooperate with such entities in investigating and stopping illegal robocallers that use its service to originate, carry, or process illegal robocalls.

TrueRing is committed to actively eliminating the ability of its customers to participate in any form of illegal activity.
