

Expectel Corp.
Robocall Mitigation Plan

Introduction

This document details the reasonable steps and actions taken by Expectel Corp. (“Expectel”) to mitigate and eliminate illegal robocalling. Expectel has an ongoing commitment to scan for and help alleviate illegal robocalling by pre-qualifying prospective customers, monitoring existing customers for traffic patterns indicative of prohibited robocalls, and working with other providers and regulatory agencies in combatting fraudulent voice activity.

Expectel provides interconnected Voice over Internet Protocol (“VoIP”) calling services. All telecom services are provided on a resale-only basis. As a telecom reseller, Expectel is dependent on our underlying provider’s assistance with monitoring their networks for fraudulent voice calling patterns.

Know Your Underlying Provider

Expectel Corp. has a master service agreement with our upstream providers and has received written assurances from their officials that it has and will continue to sign calls submitted to Expectel Corp. and will abide by the FCC’s STIR/SHAKEN and robocall mitigation rules in all respects when providing voice services to Expectel. Expectel and its upstream providers have agreed to work together diligently to mitigate all illegal robocalls, including cooperating fully when receiving traceback requests.

Know Your Customer

Screening interviews are performed to understand potential customer business models and the potential, or lack thereof, for involvement in fraudulent robocalling schemes.

In our research of the prospect, Expectel will not activate clients that provide anonymous information or where data mismatches are found. Additionally, prospects are required to agree to Expectel’s strict policies and contractual terms prohibiting the act of fraudulent voice activity as a condition of doing business with Expectel.

Individuals associated with prospects or current customers who have been known to act improperly or otherwise be involved in fraudulent robocalling will cause their companies to be rejected by Expectel as a customer and any existing customer relationships could potentially be severed.

Traceback Requests

Expectel is committed and will respond fully within 24 hours to all Traceback Requests from the FCC, law enforcement agencies, and the industry traceback consortium and vows to cooperate

with these agencies in investigating and stopping any illegal robocallers that use our service to make calls. Expectel will devote sufficient resources to provide prompt and complete information to traceback requests. Our point of contact to handle all traceback requests is:

Expectel Support
Support Manager
212-400-6400

Upon calling our dedicated Traceback Department, an initial ticket is opened with our upstream provider.

If a traceback exposes an existing customer as the source of fraudulent robocalls, or as having transmitted fraudulent robocalls, a demand for an explanation and verification of mitigation of the traffic is issued to the customer. If the fraudulent traffic is not remediated, Expectel immediately begins rejecting all traffic from the offending customer.

Telephone Numbers

A Telephone Number (“TN”) based caller identity is the originating phone number included in call signaling used to identify the caller for screening purposes that is uniquely associated with the subscriber. A subscriber is permitted to use a TN as a caller identity if a TN is directly managed by Expectel and/or obtained by Expectel from Expectel’s underlying carrier for use by the subscriber. Numbers can also be allocated by Expectel or ported using information from previous bill matching customer information.

For subscribers with multi-line telephone systems, Expectel and our underlying provider only allow calls to be connected if the originating number matches one of the TN’s assigned to the subscriber. This screening capability enables an automated and secure method of validating originating telephone numbers.

International Calling

Expectel is not currently an international voice services provider. If at any time Expectel does decide to sell our services to international customers using North American Numbering Plan resources, we will familiarize ourselves with and develop best practices for full vetting of such customers and work with our underlying provider to perform the necessary telephone number validation on all international originated calls.

Call Analytics

As a reseller, Expectel must rely on our underlying provider and/or their third-party vendors to determine if originating calls should be blocked based on call analytics practices.

Ongoing Robocall Mitigation

Expectel monitors and examines call detail records (CDRs) on a repeating basis to detect suspicious call activity and/or calling patterns. When we and/or our underlying provider detect network usage patterns consistent with illegal robocalls or suspect illegal robocalling is taking place, we will immediately seek to identify the party that is originating, terminating, or routing these calls so that we may take appropriate action. The actions taken may include, but are not limited to initiating a traceback investigation; verifying that the originating customer owns or is authorized to use the Caller ID number; determining whether the Caller ID name sent to a receiving party matches the customer's corporate and/or d/b/a name; block the party's ability to originate, terminate, or route calls on the network; and/or providing notice to law enforcement authorities.

As part of our Plan to mitigate and prevent any originating robocalls, we are committed to early identification and investigation of possible robocalling conditions. Among other things, we watch for higher-than-normal subscriber traffic volume, including large bursts of traffic in small timeframes or spikes in usage. We also monitor for originating calls of short duration and low call completion percentages, originating calls with sequential called to number dialing patterns.

Expectel Contact for Robocall Mitigation-Related Issues

The Company will update our Robocall Mitigation filings within 10 business days of any change to the information outlined in this plan. Please direct any questions related to Robocall Mitigation issues to:
