

Public Robocall Mitigation Program Description

Company Name: Acrosonic Corporation

FCC Registration Number (FRN): 0031380645

Certification Option Selected: Option 1 – Complete STIR/SHAKEN Implementation

Robocall Mitigation Program Overview

Acrosonic Corporation has fully implemented the STIR/SHAKEN caller ID authentication framework across its entire IP network. All calls originated on our network are signed and validated consistent with 47 CFR § 64.6301(a)(1) and (2).

In addition, we maintain a robocall mitigation program consistent with 47 CFR § 64.6305(a). This program ensures that our network does not originate illegal robocall traffic and includes proactive monitoring and enforcement measures.

Key Elements of the Program

1. Full STIR/SHAKEN Implementation

- All outbound calls are authenticated using STIR/SHAKEN.
- Call signing is applied uniformly across our network and interconnection points.

2. Know Your Customer (KYC) Procedures

Acrosonic Corporation maintains a Know Your Customer (KYC) program designed to prevent the origination of illegal robocall traffic, consistent with 47 CFR § 64.6305(a).

New Customer Onboarding:

Prior to enabling outbound calling capabilities, Acrosonic Corporation verifies customer identity and business legitimacy through a multi-step review process, which may include business registration verification, tax identification validation, review of intended call use cases, and assessment of anticipated call volume and patterns.

Use of Third-Party Tools:

Acrosonic Corporation utilizes both internal controls and third-party analytics tools provided by upstream voice service providers and industry partners to monitor call behavior, detect anomalous traffic patterns, and identify potential unlawful robocalling activity.

Application to Existing Customers:

KYC obligations apply not only at onboarding but on an ongoing basis. Existing customers are continuously monitored for changes in call behavior, traffic volume, or use cases that may indicate increased risk. Customers exhibiting suspicious or non-compliant behavior are subject to additional review, usage restrictions, suspension, or termination as appropriate.

3. Call Monitoring & Enforcement

- Outbound call traffic is monitored for irregular patterns that may indicate unlawful robocalling.
- Accounts generating suspicious traffic are subject to review, suspension, or termination.

4. Traceback Cooperation

- Acrosonic Corporation fully cooperates with traceback requests from the FCC, law enforcement, and the Industry Traceback Group.
- We commit to responding to traceback requests within 24 hours.

Regulatory and Enforcement History Disclosure

Acrosonic Corporation has been the subject of formal FCC Enforcement Bureau Removal Orders dated August 6, 2025 and August 25, 2025 (DA-25-737A1). The Company has since cured the identified deficiencies and updated its robocall mitigation program and certifications to ensure ongoing compliance with 47 CFR § 64.6305.
