Robocall Mitigation Efforts

Driven Element is a service provider with fewer than 1,000 subscribers.

Driven Element commits to comply with all trace back requests from the Federal Communications Commission, all law enforcement agencies, and the Industry Traceback Consortium.

Driven Element agrees to cooperate in investigating and stopping all illegal robocallers that may attempt to use its service to originate calls.

Driven Element screens all applicants to verify information about each commercial subscriber. Our subscriber agreements have language included on our zero-tolerance stance on robocalling, spam calling and other types of fraudulent and illegal call activity. We will suspend services to a customer if it determines the customer is using the service for illegal robocalling or fraudulent call activity.

Driven Element provides Caller ID and blocking as a feature available to subscribers, and will investigate suspicious activity when traffic monitoring analysis indicates suspicious traffic.

Driven Element will only accept traffic from companies registered in the Robocall Mitigation Database after September 28, 2021.

This plan is submitted April , 2024, on behalf of Driven Element

We look forward to supporting the FCC's objectives of combating unwanted robocalls, and remain at your disposal for any further clarification with this request.

Sincerely,

Loyd Mead

Driven Element
