RE: STIR/SHAKEN Implementation

Gutierrez-Palmenberg, Inc. (GPI) does not have a STIR/SHAKEN implementation. GPI is a small VoIP provider that terminates connections with a VoIP carrier with STIR/SHAKEN implemented. To reasonably secure our VoIP implementation, GPI uses the following methods.

1. Not accept call centers as VoIP customers,
2. IP Filter all devices connecting to VoIP systems,
3. Password authenticate all calls before they can be established,
4. Own and control all end point equipment.

Regards,
Gilbert T. Gutierrez, Jr.
VP, Gutierrez-Palmenberg, Inc.
