

Company Name: WWSCOMM Limited Liability Company

499 Filer ID: 837640

OCN: 544L

FRN: 0031376627

Business Type: Voice over Internet Protocol (VoIP) Provider

Plan Type: Full STIR/SHAKEN Implementation via Third-Party Provider (Sangoma)

1. STIR/SHAKEN Implementation Status

WWSCOMM Limited Liability Company has fully implemented the STIR/SHAKEN caller ID authentication framework for all SIP-based traffic. Call signing is handled by our upstream provider, Sangoma Technologies, through their compliant STIR/SHAKEN-enabled infrastructure.

2. Caller ID Authentication

All outbound calls that originate from our network and are eligible under FCC rules are signed by Sangoma using valid STI certificates. Our customers are provisioned with properly assigned numbers and are required to verify identity through a Know Your Customer (KYC) process prior to service activation.

3. Robocall Mitigation Practices

In addition to our reliance on Sangoma's call authentication:

- We enforce identity verification for all customers.
- We prohibit illegal robocalling and monitor for traffic anomalies.
- We block high-risk and known fraudulent calling patterns when detected.

4. Point of Contact for Enforcement Authorities

Name: James Tune
