

DATAONE COMPANY PROFILE

On Voice Services:

DataOne Asia (Philippines) is a VOIP carrier accredited by the NTC since 2011. It is known for delivering reliable business and communication, and operates its own Soft switch and Session Border Controller. DataOne will provide a solution for Insular Life towards sustenance of their current call center setup. The solution is intended to benefit reduced operating expenses as well as simplifying management in-terms of technical support/resource for PABX hardware. D1 will provide a cloud 'hosted' platform PBX which will able to accommodate the requirements of Insular Manila and its Regional branches together with outside the country callers. The intention of this solution is to deliver a cost effective and modern future proof PABX solution.

On Infrastructure Services:

DataOne Asia (Philippines) is the leading independent provider of Managed Technology Services to Enterprises in the Philippines. With a complete offering of services in Data Center Management, Infrastructure as a Service, Voice and IT Financing, DataOne is the perfect long term technology partner for large and medium sized enterprises. Since 2002, DataOne has specialized in offering data center its unique mix of services, competencies & financing to host & manage its' clients most demanding workloads on a 24x7 managed Tier-III data center that are ISO 27001, 9001 and PCI-DSS compliant.
