

To whom it may concern,

Umniah Mobile Company (Al Bahrana Al Urdunia Liltaknia) is a licensed operator in Hashemite Kingdom of Jordan, which provides local Telecom service and international wholesale voice services to other operators around the world.

This letter is to inform that Umniah Mobile Company does not use STIR/SHAKEN caller ID authentication technology in the Internet Protocol (IP).

Fraud management system

Our Fraud management system proactively monitors all traffic through our network, Identifying when certain predetermined thresholds are exceeded, sending alerts to detect any abnormal Outgoing or Incoming calls to all destinations.

1. Calling Number Alarms

System is able to set the thresholds that will trigger the alarms when the system finds patterns that may indicate suspicious activity in calling numbers.

2. Called Number Alarms

System is able to set the thresholds that will trigger the alarms when the system finds patterns that may indicate suspicious activity in called numbers.

3. SIM BOX Alarms

System is able to set the thresholds by MSISDN that will trigger the alarms and automatic Blockage of the specified traffic when the system finds patterns that may indicate suspicious SIMBOX traffic.

Trace back

Our commitment to respond in a timely manner to all trace back requests from the FCC and cooperate with such entities to stop any illegal rob caller that use our network **are limited to the current system capabilities/configurations.**
