Robocall Mitigation

All of the phone numbers we have on our network are for customers and dedicated to their personal or business use.

We have some termination that we provide, however all for large know companies and CLECs in North America, no customers outside of North America or outbound call centers.

We have subscribed to and will pay on a per call basis to some of our terminating telcos and service providers to certify calls that we send to them for termination. We work with a very small number of well established providers who support Robocall Mitigation.

We are a small niche service provider addressing the needs of a small and specific market segment and not providing bulk termination services to the unknown parties.

Thank you

Glen Simon
