

STIR/SHAKEN implementation exemption: Standard Bell Communication Services, Inc. (d/b/a SBCS, Inc.) is a small voice service provider as defined under paragraph A of 47 CFR § 64.6304.

We exclusively resell voice services from a SIP voice network and feature server wholly owned and operated by Ooma/2600hz (Ooma acquired 2600hz in 2023), a separate entity with their own RMD filing and compliance.

We do not own or administrate any voice network infrastructure ourselves, and we do not interconnect with carriers. Ooma/2600hz implements and manages whichever carrier interconnects they choose, and they are invisible to us as resellers.

Ooma/2600hz provides STIR/SHAKEN implementation and Robocall Mitigation automatically as part of their services to us.
