To Whom It May Concern

AcroVoice Solutions Inc knows the origination of all traffic on its network and keeps logs of such information. Any request for the source of any specific traffic will be responded to in a timely manner as it always has.

Once AcroVoice's upstream carriers finish implementing STIR/SHAKEN and/or relevant agencies allow AcroVoice to obtain its own signing keys, AcroVoice is capable of and prepared to sign all calls.

In the meantime the signing of calls is limited and/or implemented by AcroVoice's upstream carriers.
