

1800 Notify Robocall Mitigation Program (RMP)

Updated Apr 4, 2024

www.1800notify.com

Only Approved Client Calls: The only calls that go out of the 1800 Notify network are ones from customers with which 1800 Notify has a signed service agreement.

Blocklist: Only outbound phone calls from the 1800 Notify system are reviewed to ensure that they are not on any Blocklist - these phone numbers are owned by our clients and usually their clinic or hospital phone number.

Caller ID analysis - Only outbound phone calls from the 1800 Notify system are from phone numbers owned by our clients --usually their clinic or hospital phone number -- we know that these are not from a bad reputation, they are real phone numbers for our clients. So we know that Caller ID Analysis will result in a positive reputation.

Caller ID Lookup: Only outbound phone calls from the 1800 Notify system are from phone numbers owned by our clients --usually their clinic or hospital phone number -- we know that these are not from legitimate businesses.
