To Whom It May Concern:

We are making every effort to block robocalls and/or unauthorized use of our networks. We exclusively use an upstream provider Commio for all our originating traffic. It is publicly documented that they sign calls on behalf of their customers depending on if the phone number the call is originating from is held by them. All our systems are based on IP authentication. All of our traffic should fall under Full A or Partial B Attestation. This is how we are operating currently and we will continue to follow industry best practices.

Know Your Customer

We follow the best practices for vetting caller identity described by the NANC Call Authentication Trust Anchor Working Group. (<https://docs.fcc.gov/public/attachments/DOC-367133A1.pdf>)

Traceback

We respond to all traceback requests from the Commission, law enforcement, and the registered traceback consortium and cooperate with such entities in investigating and stopping any illegal robocallers that use our service to originate calls.
