

Advanced Networking, Inc.

Telephone 302-792-9200 www.advnetwork.com

FCC Robocall Mitigation Program April 9, 2024

We Know Our Customers:

- Advanced Networking, Inc. is a small business that only does business with end-users that we know. We do not allow our services to be acquired through any other way other than a series of meetings that allow us to know the nature of their business.
- We only provide services to customers that have a physical presence in the United States.
- We do not provide service to customers that use automated systems to call anyone other than their existing customers.
- We do not allow our customers to modify their outbound caller identification.
- We only identify outbound calls with phone numbers that are directly associated with that customer.
- Any confirmation of fraudulent use of our service will result in a service disconnection to that customer until the issue is resolved.

Trace-back

- Advanced Networking, Inc. is committed to respond fully within 24 hours to all traceback requests from the Commission, law enforcement, and the industry traceback consortium, and to cooperate with such entities in investigating and stopping any illegal robocallers that use our service to originate calls.
