

Robocall Mitigation Policy

- We verify all SIP calls originate and terminate on our network.
- All SIP calls are authenticated and exchange with other voice service providers.
- We are committed to respond to requests from the Industry Traceback Group to trace suspect calls from mitigation efforts.
- We will block all calls or callers that are believed to be illegal in cooperate in investigating any illegal robocalls.
- All volume callers are blocked unless the business is registered as a telemarketing.
- We ensure that the caller IDs for each DID/line are set during account setup.
- We look for overlapping/multiple deployed voice path subscription.
