

Robocall Mitigation Plan

Ardigy Communications, LLC is committed to cooperating with the Federal Communications Commission (FCC), law enforcement, and the industry traceback consortium in investigating and stopping any illegal robocallers that it learns are using our service to originate calls or transit calls into the United States and territories.

Ardigy, nor any of our executives or principals have a history of enforcement actions for illegal robocalls, TCPA or TSR violations or related state law violations.

We have not been prohibited from filing a certification in the Robocall Mitigation Database.

We use the affirmative and effective measures detailed below to prevent the origination or transit of illegal robocalls.

Know Your Customer

We follow the best practices for vetting caller identity described by the NANC Call Authentication Trust Anchor Working Group. (<https://docs.fcc.gov/public/attachments/DOC-367133A1.pdf>).

Traceback

We respond to all traceback requests from the Commission, law enforcement, and the registered traceback consortium and cooperate with such entities in investigating and stopping any illegal robocallers that use our service to originate calls.

STIR/SHAKEN Extensions

We are a reseller of voice services hosted on **Telinta's TeliCore** VoIP platform which uses TransNexus Robocall Mitigation products to monitor outbound voice traffic and we do not have the capability to implement STIR/SHAKEN.

Robocall Mitigation Program

We rely on software provided by TransNexus for Telinta to monitor our outbound voice traffic in real time to prevent the origination of illegal robocalls.

Combining behavioral analytics, caller authentication and verification, our solution features:

- **Fraud Detection:** Detection of high volume robocalling, spoofing and spam call activity.
- **Subscriber Notification:** Caller ID Name override to warn subscribers of suspicious calls.
- **Call Blocking Support:** Accurate identification enabling you to block fraudulent phone calls as per the TRACED Act (2019)

- **Business Number Verification:** Register legitimate business numbers to prevent unintentional call blocking.
- **Caller ID Name Service:** Easy integration of Caller ID name lookup service, including robocall mitigation with override to include original caller ID even when call is determined fraudulent.

In addition, we have implemented a Call Abuse Policy and have published the following policy to our web site, terms of use, and have notified our customers of the policy as copied below:

*“Any call originated on the **Ardigy** network is subject to inspection and investigation if the call is suspected of being fraudulent, abusive, or illegal. Calls meeting any of these criteria will be blocked. If these conditions are repeated, becoming excessive, the subscriber may be disconnected from **Ardigy** network, may be subject to further investigation by the FCC for enforcement of the TRACED Act and the subscriber may be subject to fines and penalties imposed by the FCC or the jurisdictional court.”*
