### *Reasonable Steps to Mitigate Robocalling*

---

This document outlines the steps **pute.us** (AKA *MeThinks, LLC*) has taken to mitigate Robocalling on its networks, per the FCC's request and in relation to the FCC Robocall Mitigation Database program.

1. All related systems are directly managed by **pute.us** (AKA *MeThinks, LLC*) and access by 3<sup>rd</sup> parties or direct clients are not allowed.
2. Call termination is limited to known, verified and approved IP addresses. Processing anonymous traffic is strictly prohibited.
3. Phone systems and handsets are secured by non-default login credentials.
4. Phone systems are regularly updated with security patches or updates.
5. Voice network traffic is continually monitored for unusual traffic patterns. If identified, an investigation commences to determine the cause and whether it's related to illegal or malicious activity.
