

Robocall Mitigation Statement

VoIP.us is a small VoIP provider serving fewer than 100,000 subscriber lines and therefore qualifies for an extension until June 30, 2023 of STIR/SHAKEN Implementation under 47 C.F.R. §64.6304(a)

VoIP.us works with Tier 1 carriers only that have fully implemented STIR/SHAKEN.

Also, VoIP.us uses Telinta's TeliCore Class 4 & 5 Cloud-Based VoIP switch platform which is pre-integrated with TransNexus, - a leading provider of STIR/SHAKEN solutions for VoIP providers.

VoIP.us commits to respond to all trace back requests from the Commission, law enforcement, and industry trace back consortium(s), and to cooperate with such entities in investigating and immediately stopping any illegal robocalls that use its service(s) to originate calls.
