

Open Tier Systems Compliance with STIR/SHAKEN FCC Requirements

At Open Tier Systems, we are committed to ensuring compliance with industry standards and regulations to provide our clients with secure and reliable communication services. In accordance with the FCC's STIR/SHAKEN requirements, we have implemented measures to prevent the receipt of unauthenticated Session Initiation Protocol (SIP) calls directly from originating providers.

Our Approach to Compliance

Open Tier Systems utilizes a carefully curated selection of communication platforms, including Microsoft Teams, Clearly IP, and Voneto, all of which are recognized as Grade A Full Attestation authenticated phone number providers. By exclusively partnering with these reputable providers, we maintain a high level of confidence in the authenticity and integrity of incoming calls.

Microsoft Teams

As a leading communication and collaboration platform, Microsoft Teams offers robust security features, including authentication mechanisms that adhere to STIR/SHAKEN standards. By leveraging Microsoft Teams for our communication needs, Open Tier Systems ensures that all calls received through this platform are authenticated and validated, reducing the risk of fraudulent activity.

Clearly IP

Clearly IP is another trusted provider in the telecommunications industry, offering Grade A Full Attestation authentication for phone numbers. By utilizing Clearly IP's services, Open Tier Systems further strengthens its compliance with STIR/SHAKEN requirements, providing our clients with enhanced security and reliability in their communication channels.

Voneto

Voneto is renowned for its commitment to security and compliance, offering Grade A Full Attestation authentication for phone numbers, in alignment with STIR/SHAKEN standards. By partnering with Voneto, Open Tier Systems ensures that calls received through this platform are thoroughly authenticated, enabling us to deliver uninterrupted and secure communication services to our clients.

Conclusion

At Open Tier Systems, we prioritize the security and integrity of our communication infrastructure. By exclusively partnering with Grade A Full Attestation authenticated phone number providers such as Microsoft Teams, Clearly IP, and Voneto, we demonstrate our dedication to compliance with STIR/SHAKEN FCC requirements. Our clients can trust that their communication channels are safeguarded against unauthorized and fraudulent activities, enabling them to conduct business with confidence.
