Account Notification

Dear Momentum Customer,

The FCC has clarified that VoIP resellers that do not have their own STIR/SHAKEN token through a registration with iconectiv must have FCC robocall mitigation database certifications that have selected the following options:

- Voice Service Provider without a STIR/SHAKEN obligation
- Option #3, No STIR/SHAKEN implementation

This clarification requires you to amend your certification if you have previously selected the option that you are a voice service provider with a STIR/SHAKEN obligation and chose Option #1 (full implementation). If you do not comply with this FCC direction **by September 18, 2025**, Momentum will no longer be allowed to provide A-level attestation for calls originated by your customers, which may decrease the chances that such calls will be answered.

We ask that you confirm to us by **September 13th** by contacting your dedicated Momentum Account Manager that you are properly certified as no obligation/no implementation so that we have time to prepare our systems for the FCC's September 18th compliance deadline.

Thank you,

Momentum
