Subject : Robocall Mitigation Database Filing

We are a french telephony carrier, providing services mainly to french corporations.

We are fully compliant with our local regulator (ARCEP) :

- Forbidding the use of a geographical number (starting with 01 to 05) or a multi-purpose number (09) as the caller ID for international calls or messages, when no authentication mechanism is in place;
- Forbidding automated systems that make more calls and transmit more messages than they receive from using geographical numbers (starting with 01 to 05), mobile numbers (06-07) or multi-purpose numbers (09) as their caller ID.

We don't have a STIR/SHAKEN implementation, but we have metrics (channels, caps) and alerts that can trigger a cut off when required.

TELECOM • OBJECT

SARL au capital de 113 415€ – Siret : 482 695 343 00038 – APE : 6110 Z – N° TVA : FR 07482695343
